# THE SCHMID GROUP

**TAILOR-MADE SOLUTIONS FOR  
CHALLENGING PROJECTS**

## **EMIL SCHMID MASCHINENBAU**

The largest plant of the SCHMID GROUP and its main site in Germany. Specializes in tailor-made plant production and specialized machines, interlinking, including engineering, electrical engineering, and control technology.

## **EST TECHNOLOGIE**

Sophisticated data control and process solutions for control and monitoring of screwdriving and press-fit technology.

## **SCHMID CLEANTECH**

Decades of experience in tailor-made construction of water-based cleaning systems in the high- and low-pressure sector.

## **SCHMID MACHINERY**

Located in Nanjing (Jiangsu Province in China) for fast and flexible service delivery as well as on-site services.

## **SCHMID E-MOTIVE**

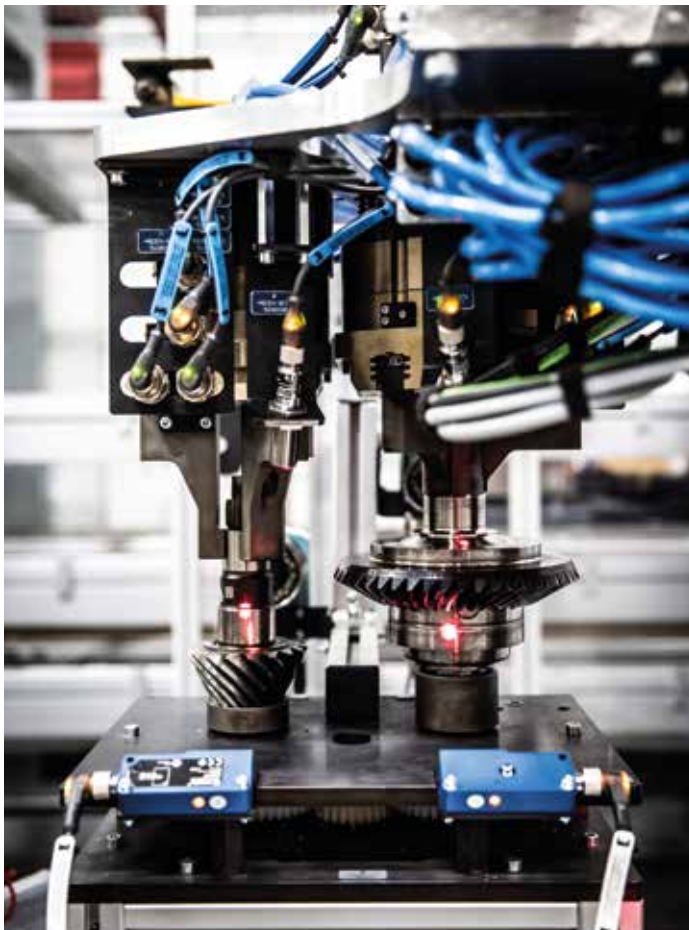

Strategic partner for the production of the electrical drive focussed on stators.

## E-DRIVE TECHNOLOGIES: ROTOR, STATOR, BATTERIES & FUEL CELL

SCHMID-products for the **E-Drive Powertrain** are used everywhere; where companies develop and produce environmentally friendly technologies and alternative drives. We invest our experience, know-how and ability in productive and reliable investment solutions in the electrical motors and storage media – simply at the pulse of time and beyond the horizon.

Production technology in particular can make a significant contribution to reducing the manufacturing costs of electrically driven vehicles. Benefit from our innovative assembly processes to be at the forefront of crucial processes in the production of alternative drives.

## CLASSIC POWERTRAIN

We offer exemplary solutions for **Classic Powertrain**.

Our expertise in **engine assembly** ranges from individual assembly stations to complete assembly lines for both internal combustion engines and engine components.

We are an evenly competent partner for solutions for the **highly complex processes in the power-train sector**. Whether you decide on individual stations or a complete turnkey project, it is entirely up to you – we deliver the perfect, complete solution.

## WATER-BASED CLEANING SYSTEMS

Increased environmental requirements, energy savings, extended maintenance intervals: With our decades of know-how, we offer you the ideal foundation for implementing all these requirements in the field of **water-based cleaning systems** in a targeted manner.

We offer complete solutions covering the entire area of high-pressure cleaning as well as low-pressure cleaning technology, deburring technology, including media preparation with adapted filtration systems, drying devices and automation systems.

## STATE-OF-THE-ART SCREWDRIVING-, JOINING-, AND INFORMATION TECHNOLOGY

With reference to the Industry 4.0 we offer you **state-of-the-art screwdriving-, joining-, and information technology**. Our specialists help you in the interlinking of production- and assembly plants, especially for controlling production, tracking parts, and documenting process data. Here they use future-oriented data-, control-, and process solutions.

# HIGHEST STANDARD

## INNOVATIVE AND INDIVIDUAL SPECIALIZED MACHINE CONSTRUCTION

Automation, deburring, cleaning, assembling, handling and chaining: As unique as our customers' production demands are, so are our tailormade solutions.

With the holistic manufacturing solutions of the SCHMID GROUP, you can successfully plan, seize growth opportunities and sustainably strengthen your market position.

In doing so, we place great emphasis on the confidential transfer of technology to our customers. Through many years of experience we have learnt that exactly this comprehensive range of services and dimensional solutions guarantee lasting costs-effectively and efficiently.

# YOUR BENEFIT

WE ARE THE SPECIALISTS FOR YOUR SPECIAL TASKS

- ✓ Your trusted partner with more than 60 years experience in Classic Powertrain and E-Drive Powertrain.
- ✓ Highest quality through professional excellence.
- ✓ Made in Germany: Secure efficiency, sustainable innovation and a visionary view.
- ✓ Complete services delivery – from planning and construction, to production and assembly to commissioning, to training your employees.
